Over the years Mydibel encountered several packaging challenges. From replacing existing baggers, adding baggers to handle a production capacity increase, to the equipment of an entire new production facility. A constant throughout the years is their need for a trustworthy packaging solution providing good quality bags at high speeds while meeting the latest hygiene standards. And this for a wide variety of products and bag sizes.

Over 15 SVC 4020 machines in 7 years provided Mydibel the optimal packaging solution for their needs. The machines enable the customer to pack a wide variety of potato products, from 500 grams to 2500 grams, in pillow bags at a speed of up to 70 bags per minute. The hygienic open machine design makes it easy to clean and operate, keeping the machine downtime to a minimum. The SVC 4020 allowed Mydibel to boost production by 30%.

With Syntegon we have found a reliable partner that anticipates our needs with technological advancements, allowing us to stay ahead of the competition.

Carlo Mylle, CEO of the Mydibel Group
Mydibel is a producer of a wide range of chilled, frozen and dehydrated potato products marketed under its own name as well as private label brands. Hygiene is as important to them as product and bag quality because they want to offer the best product possible to their customers and the end consumer. Trust of the company in Syntegon and the SVC 4020 vertical bagger made it a logical choice for their projects.

And the story of Mydibel and Syntegon continuous as new innovations for frozen food packaging are continuously being worked on.

**PROJECT**

**PRODUCTS**

- > 15 SVC 4020 machines for:
  - French fries and a wide variety of other potato products
  - Bags with a weight from 500 grams up to 2,5 kg
  - Range of pillow bag formats
